### Section 4: First aid measures

#### 4.1 Description of first aid measures

In case of inhalation: provide the victim with access to fresh air and rest. In all cases of doubt, if symptoms persist, consult a doctor.

In case of skin contact: immediately rinse the skin with plenty of water, apply a protective bandage, consult a dermatologist.

In case of contact with eyes: immediately rinse eyes thoroughly with plenty of water; remove contact lenses if present, then continue rinsing for 10-15 minutes. Consult an ophthalmologist.

If swallowed: rinse mouth immediately, drink 200-300 ml of water with activated charcoal. DO NOT INDUCE VOMITING. Consult a doctor and show him/her the label of this container. There is a danger of strong a corrosive effect on the stomach and esophagus.

#### 4.2 Most important symptoms and effects, both acute and delayed

In case of inhalation: may cause irritation of the respiratory tract, dry cough, sore throat, difficulty breathing, headache, dizziness.

In case of skin contact: skin redness, irritation, inflammation, chemical burns.

In case of eye contact: pain, blurred vision, risk of serious eye damage, irritation, redness of the eyes, lacrimation, blurred vision.

If swallowed: burning in the mouth, nausea, pain in the esophagus and abdomen, weakness.

#### 4.3 Indication of any immediate medical attention and special treatment needed

There is no additional information about special first aid measures.

### Section 5: Firefighting measures

#### 5.1 Extinguishing media

Flammable properties: The product does not burn, but the polymer packaging can be involved in a fire.

Use appropriate extinguishing agents: Apply fire extinguishing measures according to the environmental conditions. Spray water, CO2 foam, dry chemical powder, sand.

Unsuitable extinguishing media: Do not use a direct water jet on burning materials.

#### 5.2 Special hazards arising from the substance or mixture

Hazardous combustion products: carbon oxides, sodium oxide, sulfur oxides, nitrogen oxides.

Special protective equipment for firefighters: Use the full set of protective clothing and breathing apparatus required for the specific fire area. Use eye protection.

#### 5.3 Advice for firefighters

Use standard firefighting equipment such as self-contained breathing apparatus and full protective equipment. Use filters for organic vapors. Spilled product creates a slippery surface.

Do not allow fire extinguishing water to enter sewers or water sources. Dispose of contaminated water after extinguishing the fire in accordance with national regulations. Extinguish the fire from a sufficient distance using standard precautions.

### Section 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

##### 6.1.1 For non-emergency personnel

Wear personal protective equipment for eyes and skin. Avoid contact with eyes and skin. Do not inhale vapors and aerosols. Cover with non-combustible material - absorbent, collect, place in a container, hand over for disposal. Rinse the spill area with plenty of water. Collect used water for disposal. Ensure proper ventilation.

In case of insufficient ventilation, use suitable breathing equipment. Stop or limit the leakage at the source, if safe to do so. Evacuate personnel to a safe area. Restrict access to the spill area until cleanup is complete. Repair the leak if it can be done without risk. Spilled product creates a slippery surface. Eliminate all sources of ignition.

##### 6.1.2 For emergency responders

Use personal protective equipment. Stop or limit the leakage at the source if it is safe to do so. Evacuate personnel to a safe area. Restrict access to the spill area until cleanup is complete. Repair the leak if it can be done safely. Eliminate all sources of ignition. Ensure that cleanup is carried out by qualified personnel only.

Small spills: cover with an absorbent (vermiculite, sand, earth), collect in a container for further disposal.
